

Latens

Software Engineers (Senior/Engineer/Integration Grades)

Latens Systems is seeking to strengthen our Engineering Team by making additional appointments based in our Hyderabad office.

All engineer roles require C or C++ programming experience either in a server/PC or embedded environment.

Candidates should have a Degree in Software Engineering, Electrical/Electronics Engineering, Computer Science or equivalent experience and skills.

Software Engineers (Code: SE-HYD-12-09) / Senior Software Engineers (Code: SSE-HYD-12-09)

Experience in one or more of the following areas is also desirable: Cryptography, Real Time development, Linux and Windows Application development, Security Technologies, Database development and Data Communications.

Set Top Box Integration Engineers (Code: IE-HYD-12-09)

Candidates must have around 2 years of development experience and must have worked in C or C++ programming in a server/PC or embedded environment. Experience in Unix/Linux, Configuration Management tools (CVS, SVN, etc) and Makefiles is essential. Responsibilities include Integration of Conditional Access software on Set Top Boxes and debugging issues arising out of integration.

The successful candidates will be graded based on their level of technical experience.

Training will be provided in all aspects of the role and associated technologies.

Latens offers a remuneration package which includes a competitive salary and additional flexible benefits.

As we operate in a Global Environment, the role may provide opportunities for travel.

Application Procedure

Please submit your CV to jobs@latens.com stating clearly the vacancy title and code in the subject heading.
